OBJECTIVE

As I continue to expand my technical expertise, I am actively seeking opportunities to contribute to real-world projects and gain professional experience. I am eager to learn from experienced professionals, collaborate with teams, and make meaningful contributions in any capacity. I am currently seeking co-op & internship opportunities of any length.

PROJECTS

Chrome Extension – Article Summarizer:

- Designed and implemented a Chrome Extension using JavaScript and HTML/CSS, providing users with a convenient tool to summarize online articles.
- Improved web browsing by enabling users to quickly extract key information from lengthy articles, enhancing efficiency and comprehension.

Weather App:

- Designed and built a user-friendly weather application using JavaScript and HTML/CSS, allowing users to access real-time weather information and forecasts for their locations.
- Showcase technical skills and understanding of web development by successfully creating and launching a functional application.

Space Invaders:

- Demonstrated strong programming skills and expertise in game development by successfully building a Space Invaders-style game in Java with comprehensive user interface features and high-score functionality.

Pokémon Battle Simulator:

- Exhibited strong technical abilities in Java development by designing and implementing a feature-rich game with an intuitive user interface and a robust high-score tracking system.

EDUCATION

Bachelor of Engineering, Specializing in Software Engineering

2022-2026

York University, Toronto

GPA: 3.65 (4.3 scale)

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C#, HTML/CSS, Matlab, JavaScript

Tools & Frameworks: Git, CMD, Maven

LEADERSHIP EXPERIENCE
